PRACTITIONER TRAINING · AUTOMOTIVE QUALITY

APQP: Advanced Product Quality Planning Training

Self-paced online training (video) · English, with captions

Plan a new automotive product launch with advanced product quality planning, from customer requirements and feasibility to design, process development, control plans, validation and a smooth launch.

WHO IT IS FOR

Quality and programme managers, product and process engineers, supplier quality engineers, and APQP team members at automotive suppliers and their sub-tier suppliers.

WHAT YOU WILL LEARN

- Explain the purpose of APQP and how it supports IATF 16949 and customer requirements
- Set up a cross-functional APQP team, a timing plan and gate reviews
- Define the inputs and outputs of each planning phase, from concept to launch
- Link APQP to design and process FMEA, MSA, SPC and PPAP
- Develop prototype, pre-launch and production control plans
- Track APQP status and risk, and manage changes and lessons learned

PLANNED OUTLINE

1. APQP foundations
2. Planning and defining the programme
3. Product design and development
4. Process design and development
5. Validation and launch
6. Feedback and improvement
7. Managing APQP
