AWARENESS TRAINING · HEALTH & SAFETY

Contractor Safety and Permit to Work Training

Self-paced online training (video) · 10 modules · about 110 min of video · about 3 hours in total · English, with captions

Control contractors and high-risk work safely: what ISO 45001 requires for contractors, choosing and briefing them, and how permit to work systems are issued, displayed, handed over, closed and audited.

WHO IT IS FOR

Site, plant and facility managers, maintenance and engineering supervisors, permit issuers and area authorities, contractor managers and supervisors, procurement staff who appoint contractors, health and safety officers, and internal auditors of ISO 45001.

WHAT YOU WILL LEARN

- Explain what ISO 45001 requires for contractors and at workplaces shared by several employers
- Plan a contractor job and select contractors on health and safety evidence
- Induct, brief and supervise contractors on site, and review their work
- Decide when a permit to work is needed and who does what in the permit system
- Issue, display, suspend, hand over and close a permit safely
- Monitor and audit a permit system and act on what you find

MODULES (10)
