AWARENESS TRAINING · GOOD PRACTICE (GXP)

ICH Q10 Pharmaceutical Quality System Training

Self-paced online training (video) · English, with captions

Understand and apply the ICH Q10 pharmaceutical quality system: its objectives and enablers, management responsibility, the four system elements, management review and continual improvement across the product lifecycle.

WHO IT IS FOR

Senior and site managers, QA heads and quality system owners, QA, QC, production and development staff, and anyone who runs CAPA, change management, monitoring or management review at a pharmaceutical or API manufacturer.

WHAT YOU WILL LEARN

- Explain the ICH Q10 model, its objectives and how it relates to GMP
- Describe what senior management must do for an effective quality system
- Apply the four elements: monitoring, CAPA, change management and management review
- Use knowledge management and quality risk management as enablers
- Control outsourced activities and purchased materials
- Measure the quality system with performance indicators and improve it

PLANNED OUTLINE

1. The Q10 model
2. Management responsibility
3. The enablers
4. The four elements
5. Improving the system
6. Putting it together
