PRACTITIONER TRAINING · INFORMATION SECURITY

Information Security Risk Management (ISO/IEC 27005:2022)

Self-paced online training (video) · 14 modules · about 105 min of video · about 3 hours in total · English, with captions

Assess and treat information security risks with ISO/IEC 27005:2022 guidance, from risk criteria to the Statement of Applicability and risk treatment plan.

WHO IT IS FOR

ISMS leads, risk owners, IT and security managers and implementation team members working with ISO/IEC 27001.

WHAT YOU WILL LEARN

- Explain how ISO/IEC 27005 guidance supports the risk requirements of ISO/IEC 27001
- Set risk acceptance criteria and criteria for performing risk assessments
- Identify risks with asset-based and event-based approaches, and name risk owners
- Assess consequences and likelihood and determine levels of risk
- Select treatment options and controls, and produce a Statement of Applicability and risk treatment plan

MODULES (14)

1. Why information security risk matters
2. ISO/IEC 27005, ISO/IEC 27001 and ISO 31000
3. The risk process and its key terms
4. Context: parties, appetite and owners
5. Risk acceptance criteria
6. Criteria for assessing risk, and the method
7. Identifying risks: two approaches
8. Assets, threats, vulnerabilities and owners
9. Analysing risks: consequence and likelihood
10. Evaluating and prioritising risks
11. Treatment options and necessary controls
12. Annex A, the SoA and the treatment plan
13. Approval, residual risk and communication
14. Keeping risk management alive

PRICE

US$99 per learner

Per learner, by team size

1–10 learners	**US$99**
11–50 learners	**US$79**
51–200 learners	**US$69**

Excluding taxes.
