PRACTITIONER TRAINING · CLIMATE AND GREENHOUSE GASES

ISO 14064 Greenhouse Gas Accounting Training

Self-paced online training (video) · 13 modules · about 3 hours of video · about 4.5 hours in total · English, with captions

Quantify, report and prepare for verification of your organisation's greenhouse gas emissions and removals under ISO 14064-1, with the project-level and verification parts of the series explained.

WHO IT IS FOR

Sustainability and ESG managers, environmental and energy officers, carbon accountants, finance and reporting staff, and consultants preparing GHG inventories or verification.

WHAT YOU WILL LEARN

- Explain the ISO 14064 series and how it relates to the GHG Protocol
- Set organisational and reporting boundaries for your GHG inventory
- Identify and categorise direct and indirect emissions and removals
- Quantify emissions with suitable data, emission factors and an uncertainty assessment
- Prepare a GHG report and a base year that stand up to verification
- Explain project-level quantification and what a verifier will check

MODULES (13)

1. Why greenhouse gas accounting matters
2. Greenhouse gases, ISO 14064 and GHG Protocol
3. Organisational boundaries
4. Reporting boundaries and emission categories
5. Sources, sinks and significant emissions
6. Quantifying emissions: data and factors
7. Purchased electricity and the value chain
8. Inventory quality, records, uncertainty
9. The base year and mitigation activities
10. The GHG report
11. GHG projects under ISO 14064-2
12. Verification under ISO 14064-3
13. Putting it together at XYZ Cement

PRICE

US$99 per learner

Per learner, by team size

1–10 learners	**US$99**
11–50 learners	**US$79**
51–200 learners	**US$69**

Excluding taxes.
