PRACTITIONER TRAINING · AI GOVERNANCE

NIST AI Risk Management Framework (AI RMF) Training

Self-paced online training (video) · 13 modules · about 3 hours of video · about 4.5 hours in total · English, with captions

Manage the risks of the AI you build, buy or use with the NIST AI Risk Management Framework, from governance and context mapping to measuring trustworthiness and managing risks across the life cycle.

WHO IT IS FOR

AI governance and risk leads, data science and engineering managers, product owners, compliance, privacy and internal audit professionals, and owners of companies that develop or deploy AI systems.

WHAT YOU WILL LEARN

- Explain the purpose, structure and voluntary nature of the NIST AI RMF
- Describe the characteristics of trustworthy AI and the trade-offs between them
- Set up AI risk governance: policies, roles, accountability and culture
- Map the context, intended use and potential impacts of an AI system
- Measure and track AI risks with suitable methods and metrics
- Manage and monitor AI risks across the life cycle, including generative AI

MODULES (13)

1. Why manage AI risk
2. AI risk and the framework
3. Trustworthy AI and its trade-offs
4. AI actors across the life cycle
5. Govern: policies and accountability
6. Govern: culture, people and third parties
7. Map: context, categories and impacts
8. Measure: methods, metrics and TEVV
9. Measure: tracking and feedback
10. Manage: respond, monitor, deactivate
11. The Generative AI Profile
12. ISO/IEC 42001 and the EU AI Act
13. Putting it together at PQR Lending

PRICE

US$99 per learner

Per learner, by team size

1–10 learners	**US$99**
11–50 learners	**US$79**
51–200 learners	**US$69**

Excluding taxes.
