AWARENESS TRAINING · INFORMATION SECURITY

Ransomware Readiness and Backup Training

Self-paced online training (video) · 10 modules · about 110 min of video · about 3 hours in total · English, with captions

Prepare your organisation for ransomware as a manager: how attacks unfold, the controls that matter, backups that survive an attack, tested restores, the first hours, recovery and the ransom decision.

WHO IT IS FOR

Business owners, executives, operations, IT and plant managers, risk and compliance managers, information security managers and the people who own business continuity, backup and recovery decisions.

WHAT YOU WILL LEARN

- Explain how ransomware and data extortion attacks get in and unfold
- Set the prevention priorities that managers should fund and check
- Require backups that survive an attack, kept offline or immutable and tested
- Prepare the first hours of the response and the order of recovery
- Weigh the ransom decision, reporting and communication with clear facts
- Check suppliers, managed service providers and exercises with the right questions

MODULES (10)

1. A management issue
2. How attacks get in
3. Prevention priorities
4. Backups that survive
5. Restore tests, waiting time
6. The first hours
7. Recover in the right order
8. Ransom and reporting
9. Communication inside and out
10. Stay ready
