PRACTITIONER TRAINING · INFORMATION SECURITY

Third-Party and Supplier Security Risk Management Training

Self-paced online training (video) · 12 modules · about 2.5 hours of video, plus practice exercises · about 5.5 hours in total · English, with captions

Manage the information security risks of suppliers, cloud services and software from first selection to exit: an inventory, criticality tiers, risk assessment, due diligence, contract terms, monitoring, supplier incidents and offboarding.

WHO IT IS FOR

Information security and risk managers, procurement and vendor managers, IT and cloud managers, compliance officers, ISO/IEC 27001 implementers and internal auditors, and managers of outsourced and offshore services.

WHAT YOU WILL LEARN

- Explain what ISO/IEC 27001, NIST SP 800-161 and the NCSC principles expect for supplier security
- Build a supplier inventory and rank suppliers into criticality tiers
- Assess supplier risks with clear scenarios, and choose proportionate controls for each tier
- Check due diligence evidence such as certificate scopes, assurance reports and questionnaires
- Write security requirements into supplier contracts, including incident reporting, audit and exit
- Monitor suppliers, handle supplier incidents and changes, and offboard suppliers securely

MODULES (12)

1. Why supplier security fails
2. What the standards expect
3. Know your suppliers: the inventory
4. Criticality and supplier tiers
5. Assessing supplier risk
6. Due diligence and evidence
7. Security in supplier agreements
8. The ICT and software supply chain
9. Cloud services and connected apps
10. Monitoring, review and change
11. Supplier incidents and exit
12. Putting it together

PRICE

US$99 per learner

Per learner, by team size

1–10 learners	**US$99**
11–50 learners	**US$79**
51–200 learners	**US$69**

Excluding taxes.

DURATION

About 5.5 hours in total (2½ hours of video)
